Professional Summary

Full-stack and data systems engineer with over 5 years of experience specializing in scalable distributed systems and high-throughput data pipelines. Proven track record of applying data structures and algorithms in both industry and academic settings to optimize performance and reliability in large-scale systems, including pipelines processing **10M+ records weekly**. Experienced in system health monitoring, debugging, and root-cause analysis, with a strong focus on building testable, resilient software through clean architecture and cross-functional leadership. Currently pursuing a Master of Science in Computer Science and Artificial Intelligence at Boston University.

Technical Skills

- **Languages**: Java, C#, Python (working knowledge), JavaScript, SQL.
- **Frameworks & Engines:** ASP.NET Core, Spring Boot, React, Entity Framework Core**.**
- **Data & Cloud:** Azure, SQL Server, PostgreSQL, Redis, Kubernetes (exposure), Kafka (exposure).
- **Infrastructure/DevOps:** CI/CD (GitHub Actions, Azure DevOps), Microservices, RESTful APIs, JWT/OAuth/SSO, Jira.

PROFESSIONAL EXPERIENCE

AGNE | Pembroke, NH
Application Developer III | May 2024 – Present

- Architected, built, and launched **"Presell," a microservices-based e-commerce web platform** using C#, React, SQL Server and Azure, driving over $1M in weekly sales orders and reducing manual sales entry by **50%**.
- **Optimized Presell performance** by implementing Redis caching and SQL indexing, resulting in **40% faster page load times** and a **4.6/5** customer satisfaction score.
- Built a scheduled **multi-threaded C#** job integrating with a third-party API aggregating multi-vendor data, updating **100K+ product records daily** to ensure accurate and consistent product information.
- **Modernized data warehouse infrastructure** by building Azure Synapse ETL pipelines handling **10M+ records weekly**, reducing data refresh windows by **40%**.
- **Engineered a reporting portal** using .NET, SQL Server, and Azure Dedicated SQL Pool to deliver real-time analytics on inventory, pricing, and product location and cut search result load times by 50% across 100K+ items.
- **Led cross-functional, cross-region Agile teams** through bi-weekly iterations while mentoring developers; boosted code reliability by establishing structured code reviews and automated validation scripts.

Conduent | Remote
Software Developer | Oct 2022 – Mar 2024

- **Reduced authentication time by ~50%** by engineering secure Single Sign On capabilities using Java Spring Boot and JWT authentication for multiple client-facing applications.
- **Enhanced system responsiveness** for thousands of daily users by modernizing React components and optimizing complex SQL queries.

- **Eliminated manual intervention** for daily updates by building automated SQL synchronization tasks between legacy and modern systems.

Infosys | Remote
Associate Software Engineer | Dec 2021 – Oct 2022

- **Increased claims processing efficiency by 20%** by optimizing high-volume Stored Procedures supporting patient and insurance data workflows.
- **Bridged legacy and modern systems** by designing and building Java Spring Boot microservices and logical data models.
- **Ensured SLA compliance** for critical healthcare processes by diagnosing and resolving production issues across MS SQL and SSIS pipelines.

Revature | Remote
Software Engineer | Jan 2021 – Dec 2021

- **Accelerated delivery speed** for 3 full-stack applications by implementing Agile methodologies and automating CI/CD pipelines via **GitHub Actions**.
- **Optimized application reliability** by utilizing **Sonar Cloud** for in-depth code analysis and increasing test coverage.
- **Engineered complex data logic** by integrating three **PostgreSQL** databases into application logic using Entity Framework Core.
- **Ranked in the top 5 learners** for outstanding technical skill and performance in a competitive .NET Angular program.

ADDITIONAL EXPERIENCE

Data Analyst – KPMG East Africa (Aug 2018 – Jan 2021)

LEADERSHIP AND AWARDS

Procurement Power BI Dashboards | Project Lead

- Led a 6-member team using Scrum and Agile workflows to deliver 5 dashboards to the AGNE Procurement department to assist in their daily analytics and reporting.

Peer-to-Peer Marketplace | Project Lead

- Led a 4-member team using Agile workflows to deliver an MVP for a fashion marketplace (**Depop** style), supporting **1,000+ test users** during a 3-month initial rollout

PERSONAL PROJECTS

Self-Published Author | Fiction

- Authored and published a fictional novel, managing the end-to-end lifecycle of the project from creative drafting and editing to digital distribution and marketing.

EDUCATION

Boston University | Master of Science in Computer Science and Artificial Intelligence

- **Ongoing**

Makerere University | Bachelor's Degree in Computer Engineering

- **GPA: 4.2 / 5.0**
